Bookstore Assignment Introduction

- 1. Introduction
- 2. Site Map
- 3. Common Functional Requirements
- 4. Page Functional Requirements
- 5. Database Diagram
- 6. Installation & Configuration
- 7. Assignment Submission

Introduction

Purpose

- Develop a website for a book store that is called <u>Bookworm</u>
- The online bookstore's main users are divided into two categories:
 - The front end users
 - The administrator background users

Introduction

Scope

- Complete the main function for the front user
- Full responsibility for developing UI for the website base on the provided mock-ups
- Can insert or update manually a database record to make it display correctly on the website, even though don't have the administrator site
- There are 2 optional requirements which are Customer reviews and Submit review form. You can get bonus score if you complete them

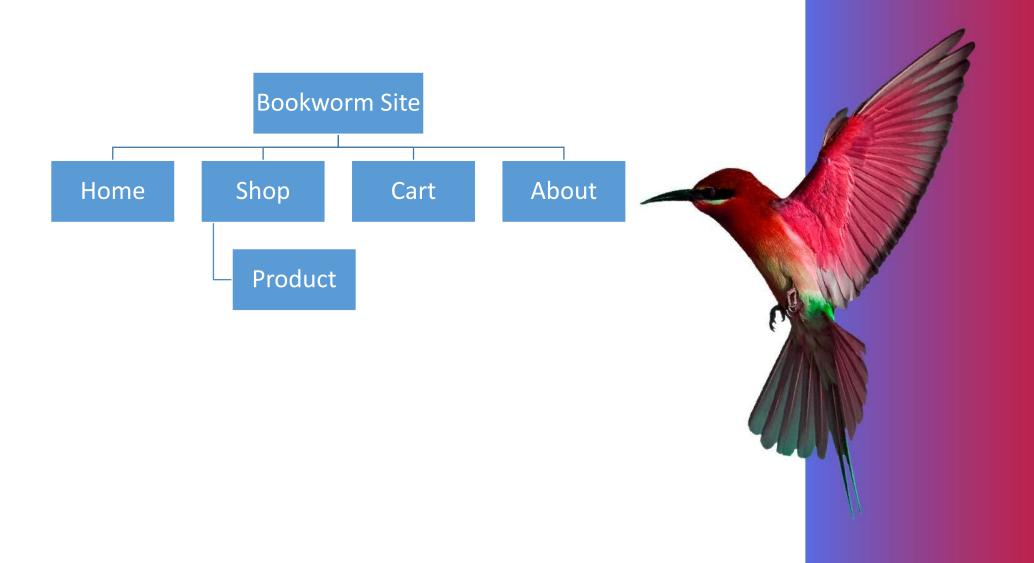

Introduction

Technical Requirements

- Using the <u>FastAPI</u> framework to build a backend system that provides API endpoints
- Using the <u>ReactJs</u> library to build a front-end system as a single page application (SPA) for the site
- Use <u>OAuth2 with Password (and hashing)</u>, <u>Bearer with JWT tokens</u>
- Using <u>PostgreSQL</u> for database
- Using the <u>TailwindCSS</u> or <u>Bootstrap</u> framework to build responsive for the site
- Besides using those technical requirements as mandatory, you might have select others to complete this assignment

Site Map

Layout

- The layout should be clear
- Common components should be consistent in both outline and colour tone or font style
- Using flexbox & grid of TailwindCSS or grid system of Bootstrap that contains the header and footer of the site
- Well support responsive is a plus point

Pagination

- Allow user to choose how many items (5, 15, 20 and 25) can display on a page
- Show a paging section that allow user to choose page index, move next or previous page
- Display pagination information following pattern:
 - In shop page, at the first page and show 5 items per page: Showing 1-5 of 126 books
 - In customer reviews list, at the second page and show 10 items per page: Showing 11-20 of 126 reviews

Book display

- The card UI displays on the listing page, only show a summary of a book such as a title, cover image, price and author name
- Full <u>details UI display</u> in product page, show full information of a book

Authentication

- Build a simple sign in popup (similar to <u>Modal</u> <u>component</u> of Boostrap) which use email and password field to authenticate an user
- Display full name of user (first_name + last_name) in the navigation bar after authenticating
- Allow user to sign out

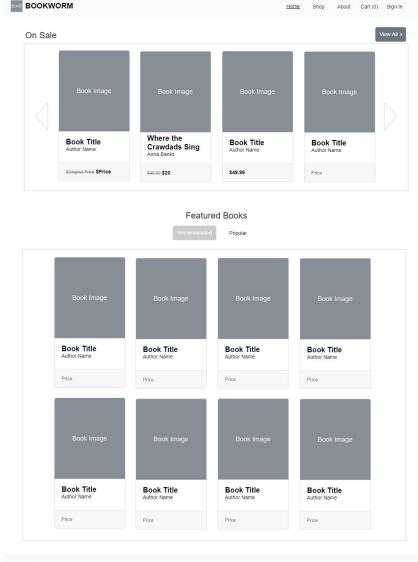

Price display

- Use the USD as the main currency \$ as the main currency symbol
- There are 2 price types, book price (book_price@books table) and discount price (discount_price@discounts table)
- The discount price might have an expired date, if not it is unlimited time. It is only available when the current date is before its expired date or its expired date is null
- If a book has an available discount price, display it as a final price and put the book price in front of it like the mock-up. Otherwise, only display the book price

Home page

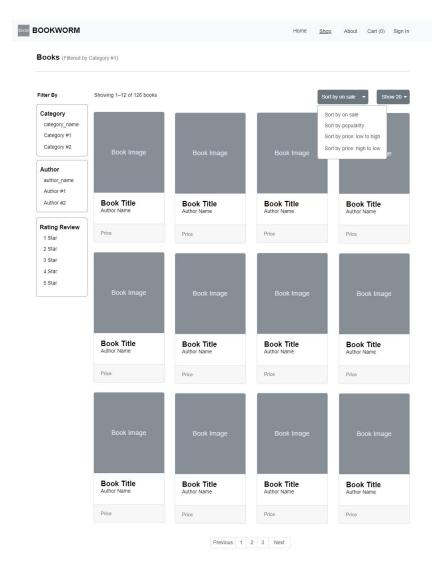

- On sale section
 - Display as a slider of book card item like <u>the</u> <u>carouse</u> of Bootstrap with multiple items
 - Get top 10 books with the most discount
 - Click on each book will open the product page of this book
 - Click on the View All button will open the shop page that automatically apply sort by on sale
- Featured books section
 - Recommended: get top 8 books with most rating starts
 - Popular: get top 8 books with most reviews total number review of a book and lowest final price

Shop page

- Listing
- Sorting
 - Allow to sort by on sale
 - Allow to sort by popularity
 - Allow to sort by price
- Filtering display each filter type section as an accordion behaviour
 - Category
 - Author
 - Rating Review

Product page

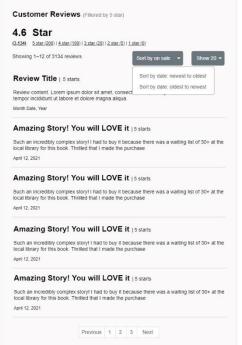

- Book details
- Add to cart
 - Display a discount price if it is available and put the book price in front. Otherwise, only display the book price
 - Provide a quantity input, maximum is 8 and minimum is 1.
 - Click 'Add to cart' button to put the book with quantity to the cart, and increase the number item of card which is displayed in the navigation bar then show a successful message.
 - In the navigation bar, display the same number item of card across the site.

 - Otherwise, show an unsuccessful message that notes which item is not available then automatically remove it from the cart.

About page

 Following the mock-up to display this page as a static page

Welcome to Bookworm

"Bookworm is an independent New York bookstore and language school with locations in Manhattan and Brooklyn. We specialize in travel books and language classes."

Our Story

The name Bookworm was taken from the original name for New York International Airport, which was renamed JFK in December 1963.

Our Manhattan store has just moved to the West Village. Our new location is 170 7th Avenue South, at the corner of Perry Street.

From March 2008 through May 2016, the store was located in the Flatiron District.

Our Vision

One of the last travel bookstores in the country, our Manhattan store carries a range of guidebooks (all 10% off) to suit the needs and tastes of every traveler and budget.

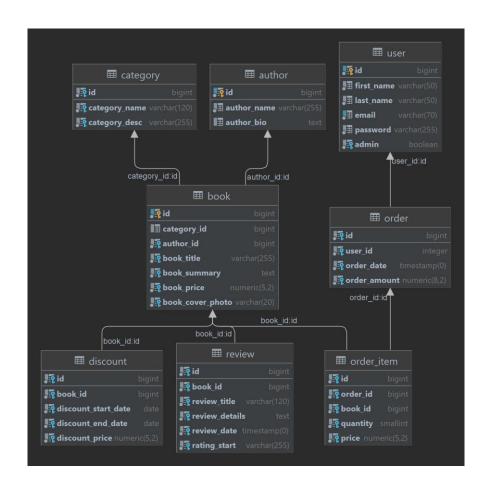

We believe that a novel or travelogue can be just as valuable a key to a place as any guidebook, and our well-read, well-traveled staff is happy to make reading recommendations for any traveler, book lover, or gift giver.

Assignment Submission

Assignment Schedule

■ Deadline: <u>05th May</u>, <u>2025</u>

Presentation day: from 06th May, 2025

Assignment Submission

Submit Assignment

- Complete your work on GitHub repo by the deadline
- Make sure your GitHub repo is public
- Provide your GitHub repo so that mentor can check out
- Any commit that is pushed after the deadline is invalid
- Any copy/clone code found will fail your whole assignment

Assignment Submission

Assignment Evaluation

- Following the "Bookworm Assignment Evaluation Checklist" to make sure that you will deliver a good product
 - bookworm_invidial_assignment_presentation_che cklist_v2.0.pdf
- You will be asked to present your work following that checklist on the presentation day
- Your code will be reviewed as a part of evaluating your work and dynamic data will be applied to check your query.
